

VITALIKUM HAIR LOSS AND OILY DANDRUFF

Recommended for the treatment of hair loss in combination with an oily scalp and dandruff

- EXTRA-INTENSIVE SANITIZING ACTION
- ELIMINATES DANDRUFF
- STOPS HAIR LOSS
- REVITALIZES THE HAIR STRUCTURE

PEELING #22

- Regulating concentrate peeling
- Gently exfoliates, boosting the regeneration of the epidermis.
- Purifies and restores the natural pH balance of the hair in conditions of excessive sebaceous secretion. The combined action of Quillaia extract, amino acids and stem cell activator stops hair loss, helps reduce oily dandruff and prevents it from appearing.
- **With Quillaia, amino acids and stem cell activator**
- **75ml**

How to use

Apply to damp, unwashed hair. Begin application by parting the hair at different points on the head. Part the hair in 5 places in the front and in 3 places on the back of the head (between the ears and the nape of the neck). Apply approximately 5 cm of product to each part. Spread evenly over the entire scalp, using your finger tips to massage it in gently, with a circular motion. Leave on for 2 minutes. Rinse with plenty of warm water. Wash the hair with the corresponding CAPILO shampoo.

SHAMPOO #05

- Extra intensive treatment shampoo
- Quillaia extract reduces the oily texture of the hair, giving it deep-down hygiene that eliminates dandruff. Its Stem cell activator boosts cell renewal and the activation of hair growth.
- **Formulated with quillaia and a stem cell activator**
- **250ml**

How to use

Apply to damp hair, massaging it in with circular movements from the forehead to the nape of the neck. Rinse with warm water. Apply a second time.

AQUA-INFUSION #33

- Regulating lotion
- It strengthens the hair fiber, making the hair shiny and full of vitality once again. The combined action of Quillaia, amino acids and the stem cell activator balances excess oil, promoting cell regeneration and boosting hair growth.
- **Formulated with quillaia, amino acids and a stem cell activator**
- **7ml (10 u. X 7ml)**

How to use

Use on freshly shampooed and towel-dried hair. Apply an entire single dose directly to the scalp, part by part. Vigorously massage in with the fingertips to stimulate the microcirculation of the scalp and favor the complete absorption of the product. Do not rinse.

HOW TO APPLY CAPIO TREATMENTS

STEP BY STEP:

- Step 1: apply the peeling (see how to use).
- Step 2: rinse the peeling off with plenty of warm water
- Step 3: wash the hair with the recommended shampoo (see how to use).
- Step 4: carefully towel-dry the hair, always massaging, never rubbing the hair.
- Step 5: apply the lotion (see how to use).
- Step 6: massage the scalp to activate its microcirculation.

LENGTH OF TREATMENT: 3 to 6 months, depending on the type of alopecia and level of persistence.
