

ENERGIKUM TEMPORARY HAIR LOSS

Recommended for the treatment of temporary or persistent cases of mild hair loss

- STRENGTHENS AND REDENSIFIES THE HAIR
- STOPS HAIR LOSS
- TONES THE SCALP
- REVITALIZES THE HAIR STRUCTURE

PEELING #21

- Stimulating concentrate peeling
- Gently exfoliates, boosting the regeneration of the epidermis.
- Purifies and acts by stimulating the microcirculation of the scalp.
- **With thermal spring water, amino acids and a stem cell activator**
- 75ml

How to use

Apply to damp, unwashed hair. Begin application by parting the hair at different points on the head. Part the hair in 5 places in the front and in 3 places on the back of the head (between the ears and the nape of the neck). Apply approximately 5 cm of product to each part. Spread evenly over the entire scalp, using your finger tips to massage it in gently, with a circular motion. Leave on for 2 minutes. Rinse with plenty of warm water. Wash the hair with the corresponding CAPILO shampoo.

SHAMPOO #03

- Invigorating treatment shampoo
- The thermal spring water and stem cell activator work together to stop hair loss, while at the same time toning and regenerating the structure of the hair.
- **With thermal spring water and a stem cell activator**
- 250ml

How to use

Apply to damp hair, massaging it in with circular movements from the forehead to the nape of the neck. Rinse with warm water. Apply a second time.

AQUA-INFUSION #32

- Mineralising lotion
- Tones the scalp and restructures the hair, giving it vitality. The combined action of thermal spring water, amino acids and the stem cell activator slows down hair loss, strengthening the hair and stimulating its growth.
- **With thermal spring water, amino acids and a stem cell activator**
- 7ml (10 u. X 7ml)

How to use

Use on freshly shampooed and towel-dried hair. Apply an entire single dose directly to the scalp, part by part. Vigorously massage in with the fingertips to stimulate the microcirculation of the scalp and favor the complete absorption of the product. Do not rinse.

HOW TO APPLY CAPILO TREATMENTS

STEP BY STEP:

Step 1: apply the peeling (see how to use).

Step 2: rinse the peeling off with plenty of warm water

Step 3: wash the hair with the recommended shampoo (see how to use).

Step 4: carefully towel-dry the hair, always massaging, never rubbing the hair.

Step 5: apply the lotion (see how to use).

Step 6: massage the scalp to activate its microcirculation.

LENGTH OF TREATMENT: 3 to 6 months, depending on the type of alopecia and level of persistence.
